

Product: Brakes, brake pads, clutch linings

Product Name	Brakes, brake pads, clutch linings
Product type	Friction Products
Sub-Product type	
Trading name(s)	Ferrobestos
Other name(s)	Brake linings
Product description	Brake pads are used as a friction material in all kind of older braking systems. They are very hard, attached to brake shoes in cars, lifts, cable drum stands, etc. Since a total asbestos ban they have not been used, but can still be found in older types of lift braking mechanisms and old vehicles.
Build element	Automotive manufacturing; automotive repair
Product identification	<p>They dark grey in colour and are surrounded by dust on adjacent parts. Reliable identification can only be achieved by laboratory analysis, but generally one can only expect asbestos containing brake pads or linings in older equipment.</p>
Known uses	Heat resistance/thermal insulation
Asbestos fibre type	Chrysotile (white asbestos)
Friable or Non-Friable	Non-Friable
Known Supplier(s)	
Known place of manufacture	
Date / period of manufacture	Up to 2003
Building construction period	1931-1940,1941-1950,1951-1960,1961-1970,1970-1980,1981-1990,1991-2000
Location	<p>Automotive & Transport</p> <p>Marine</p> <p>Other Motor Vehicles</p>
