HOW TO CONDUCT A VISUAL ASBESTOS INSPECTION OF A RESIDENTIAL PROPERTY

STEP 1: COUNCIL

Check with Council or State and Territory Government if you need to maintain a formal Asbestos Register and Management Plan or if the property may have been affected by loose-fill asbestos (Mr Fluffy) if in NSW or the ACT.

STEP 2: WHAT TO LOOK FOR

Visit asbestosawareness.com.au to view:

- The 20 Point Safety Checklist for Tradies
- 'Asbestos In Your Home – The Ultimate Renovators Guide' and,
- 'Asbestos Product Database' to familiarise yourself with the products that may contain asbestos.

STEP 3: EXTERNAL

Start in the front yard of the property. Walk around the yard looking at the various Checklist locations.

STEP 4: INTERNAL

Start at the front door. Walk through the home, one room at a time looking at Checklist locations. If you think something may be asbestos, TICK the box 'May Be Asbestos' (MBA). If asbestos 'Requires Repairs' or is in need of paint or is broken, CROSS the box RR.

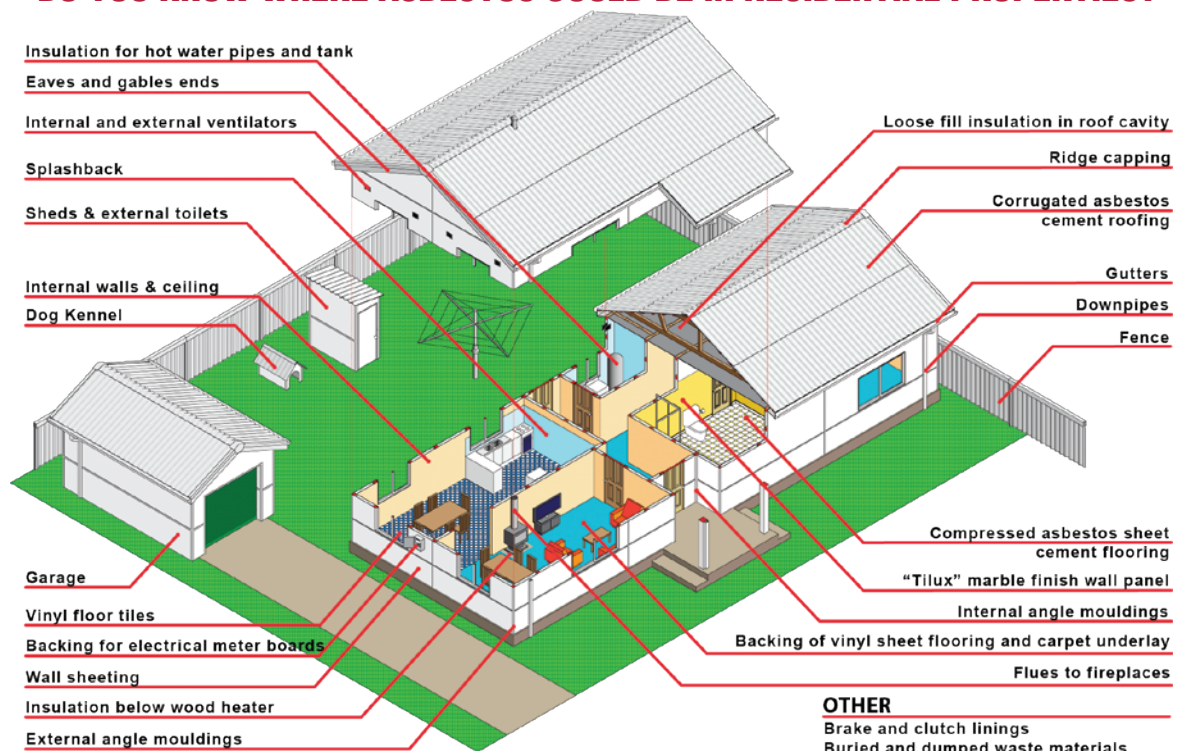

STEP 5: WET AREAS & HEATING

Asbestos products were commonly used in wet areas and with wood-fuelled heating so pay particular attention to kitchens, bathrooms, laundries and fireplaces. If you think something may be asbestos, tick the MBA box.
